

Gastro SURGERY MEDICAL CODING 2020-2021

OVERVIEW

VLMS Global offer Risk adjustment services (Medicare HCC, HHS HCC, Medicaid CDPS) and RCM services (medical billing, medical coding, AR follow up) and other comprehensive medical outsourcing solutions.

Our services were required by Chicago based hospital. They had 800 charts and wanted to do coding and audit for those charts within 3weeks.

The Challenge:

- Client provided Coding Tool that was totally new for us.
- It was necessary to add well experienced coders. Minimum 3-4yrs experience in surgery.
- They needed our assistance in Aug 2018 for Coding and audit for 800 Gastro surgical charts, which had to be completed in three weeks.

The Solution

- We moved certified and experienced surgical coders and created dedicated team. They completed the coding & audit for 800 surgical charts in three weeks, as per the client's requirement.
- Calibration with client at every stage helped us a lot.
- We were conducting team huddles daily for feedback, update.
- Our training and QA team was well experienced which helped us to complete those charts in given timeframe with accuracy.
- Client was incredibly happy as it was much needed work for them as time was main issue for them. But we completed that work nicely with accuracy in provided timeline.
